Labor Union Holds Party and Dance

Wednesday evening in the Second Ward Recreation Hall, the Raymond Sugar Factory Federal Labor Union No. 118 held their annual Party and dance. Commencing at 8:30, dancing was enjoyed for about an hour under the direction of Joe Strong, followed b ythe program..

W.S VanOrman, president of the Labor Union, was the maser of ceremonies and after the singing of O Canada by the assembly, he gave a speech of welcome and introduced the officers of the Union.

Two piano solos were given by Mrs. Karl Young, of Stirling, following which, F.R. Taylor, Assistant General Manager of Canadian Sugar Factories spoke for ten minutes. Darwin Oler, dressed as a girl and calling himself 'Betty' gave a vocal solo and tap dance. A skit, "Bluebird' was presented by the cooks and the sugar girls, followed by a few remarks by Kay Redd.

Lunch consisting of pie, ice cream, and punch was served o 100 people and the remainder of the evening was spent in dancing to the music of the Royal Canadians.. Allen James assisted Joe Streng with the direction of the danco.

Offleers of tho Unio nare as follows: W.S. VanOrman - president, Cecil Finch - Vice president, Owen Larson-Recording secretary, and Rich Bennett Secretary Treasuror. The party was under the direction of the enter tainment committee.

Carelessness of motoists, faulty visibility due to "fogging of windshields and car windows resulting from frosty weather, and failure to heed the time honored signals, STOP, LOOK and LISTEN continue to take their heavy toll in death and injuries.

This much is clearly evident from statistics compiled by the Board of Transport Commissioners for Canada showing that there were 378 accidents at railway crossings in the Dominion during 1945. These accidents resulted in a death toll of 129 persons and a total of 589 persons were injured, some of them seriously as the result of contesting the right of way with locomotives and trains.

The Board, breaking the accidents down into various compartments in order to determine underlying causes reports that in 107 cases—nearly a third of the total, it was the automobile which ran into the train.

In most other cases appears the entry, "Automobile drove onto crossing in path of train and was struck." Indicating that impaired visibility has a direct bearing on ratio of crossing accidents—as it has on most other forms of mishap involving motor vehicles—statistics reveal that the months of November and December are most prolific in accidents of this sort. During these months, days are shorter and the cold weather tends to cut down visibility by frosting windshields and windows. The imperative need for widespread use of antifrosting and de-frosting devices on all types of motor vehicles, including farm trucks, is clearly evident.

Above all, however, seems to be the need for caution at all times. The railways are doing their best to cut down the crossing accident toll by constant education among their employees and the public, and the Dominion Government assists greatly through administration of its Level Crossing fund. Nothing, however, can save drivers from their own folly.

CONTROL DESTRUCTIVE SPRING FIRES TO HAVE MORE BIRDS

Winnipeg, Canada—Spring is ahead of time, at least it looks that way Geese, Meadowlarks, Killdeer all now. Mallards, Pintails, Canada ground nesting birds are back ten days ahead of time. If this weather keeps up they will be nesting earlier than usual.

By the same token the stubble fields and haylands will be ready to burn that much earlier, too. Where burning is to be done, get it done before April 15, before that if possible, and save untold numbers of birds nests from destruction.

Ducks start to nest about April 20 Prairie chicken and Hungarian Partridge start early in May, so do many other ground-nesting, insect-eating birds.

These birds consume thousands of bushels of noxious insects. Their steady pressure on insects heads off destructive out breaks. On farms and lands are burned before April 20, communities where stubble and hay birds increase with astonishing rapidity. Lands that are to be summerfallowed should be burned over before April 15-earlier if possible. This discourages birds from nesting on fields which are to be ploughed at the time eggs or young are in the nests.

Control the burning. See that it does not destroy good nesting cover or wood lots; or run wild into marsh lands. Fire is a god servant but a terrible master.

Wildlife is a crop which thrives under wise management. Birds are valued cooperators with farmers in the fight to control grasshoppers and like pests.

Burning stubble and hayland where necessary before April 20 means more birds fewer insect pests better farm crops, happier communities.

B.W. Cartwright, Chief Naturalist, Ducks Unlimited.

COMPOSER

A pianist and composer of imagination, was how MINUETTA BOREK was described by New York critics following her Town Hall Concert debut. Born in Calgary where she received all her early musical schooling this young musician will be in Toronto to play her prize-winning "New York Suite" in the CBC "Canadian Composers Series" over the Trans-Canada network on Sunday, April 7, at 6:00 p.m.

Second Clothing Drive Starts June 17

General "Ike" Eisenhower, supreme commander of the Allied forces in the war against Germany, has received from all parts of Europo reports of conditions existing there which can hardly be imagined by the people of Canada, who are spared the horrors of war and who suffered little materially from it.

.."Many more millions of people are still in need of clothing—in desperate need," says General Eisenhower, in giving his full support to the clothing campaigns that seek to alleviate the suffering that still exists. "People are dying from exposure as well as starvation in all the war devestated countries," he continues. "Donations now will pay big dividends in terms of human life and international godd will."

Reports coming in to headquarters of the Second Canadian Clothing drive, the National Clothing Collection which is scheduled to start on June 17 and continue to the end of that month, indicate that already in many communities those who did such a splendid job last October are reorganizing for the new drive. Profiting by the experience gained in their first effort, details are being worked out and groups organized to handle ever phase of the collection and shipment of clothing when the active campaign starts.

There were 1800 communities organized for the first campaign which produced over 12 million pounds of good clothing, bedding boots and shoes, and other things needed by the homeless millions of Europe and Asia. But there were hundreds of families who, from various causes did not have the opportunity to make their contribution. In the forthcoming drive every effort will be made to see that this does not occur agai: but that not a single piece of clothing that is available is left uncollected.

An average of a pound of clothing from each member of the family is not much to ask, but in the aggregate, if everyone is able to give this amount, the result will be one of which Canadians will again have reason to be prond.

"Dont put all your winter clothes away in the cedar chest," said Mr. William M. Birks, of Montreal, national chairman of the campaign."Put them on one side now, so that when the clothing campaign comes along you will have the satisfaction of knowing that you are contributing something that will be of real benifit to those who need clothing of all kinds so badly, and help them to maintain the morale that is so necessary if Europe is to be rehabilitated quickly and worse disasters than war avoided among the broken homeless peoples."

NEWS NOTES

Ken Shaw has received his discharge from the R.C.A.F. and is home to stay.

Mr. C.A. Minty of Wilkinson and McClean was in Raymond last week when he quoted probable cost of laying a pipe line to put water in the Cemetary.

Clarence Allred has returned after spending the last two weeks in Salt Lake with friends and relatives. He attended conference while there.

Word has come to us here that Susie Dunn, wife of the late Jimmie Dunn, old time residents of Raymond passed away in Salt Lake on Sunday Apil 7th.

Jimmie Dunn predeceased Mrs Dunn by two years. He was one time Marshal of Raymond and many people here will remember them well.

The Womens Institute met Thursday evening at the home of Mrs. Annie Woolley. Mrs. June Allred gave an interesting book review. Mrs. Walt Zobell was assistant hostess.

Mr. and Mrs. Reid Litchfield entertained in honor of Mr. and Mrs. Chas Fawns last Sunday evening.

Malcolm Smith is a patient in the hospital having underwent an operation for appendicitis.

Mrs Reva Heggie is a patient in the local hospital.

Hazel Cooper is an appendicitis patient in the hospial.

The Sunday Night Group met last Sunday at the home of Mr. and Mrs. Lyman Jacobs.

Mr. and Mrs. Charlie Fawns were week-end visitors in Raymond.

Mrs. Hudson of Magrath is a Raymond visitor at the home of her son, C.A. Hudson.

CANINE CAPERS

— — THROUGH STONE WINDOW

Sounds queer doesnt it but its a fact. Wednesday morning just before closing time a dog entered Stones When Ken shouted " Scat" the dog did just that and took the quickest way out which happened to be through the front window. When Ken shouts scat we presume he means it.

PLANT ENGLISH GARDENS

Over $600. worth of garden seeds have been sent by the Boy Scout of Canada in recent weeks to Boy Scouts Troops in Great Britain to be used in the drive for moerfood for hungry Brions.

I SING OF BROOKS.

I sing of brooks, of blossoms, birds and bowers,
Of April, May, of June and July flowers;
I sing of may poles, hock-carts, wassils, wakes,
Of bridegrooms, brides and of their bridal cakes;
I write of youth, of love, and have accecss
By these things to slug of cleanly wantoness;
I sing of dews, of rains, and, piece by piece,
Of balm, of oil of spice andambergris
I sing of times of trans-shifting, and I write
How rose first came red and lilies white;
I write of groves, of twilights, and I sing
The courts of Mab, and of the fairy King;
I write of hell; I sing (and ever shall)
of heaven, and hope to have it after all.

—Robert Herrick

A picure for the [illegible] starts Monday for 3 days. 'A Tree Grows In Brooklyn'. Come and bring all he kiddies.

Canada And The Food Crisis

IT IS REGRETTABLE that the end of the war did not also bring the end of privation and suffering among the people of the world. On the contrary, in all but a few fortunate countries, of which Canada is one, the people are faced with food shortages which are expected to be more serious than any experienced during the war. Crop failures in many parts of the world, the breakdown of transportation facilities due to the war, and shortage of shipping space in the past, have all contributed to the alarming conditions which now exist in respect to the world food supply. Wheat and cereals are among the foods most urgently needed at the present time, and this need will continue to be urgent at least during the next four or five months or until the 1946 cereal crop is harvested.

• • • • •

Four Countries Able To Export

Officials of the United Nations' Relief and Rehabilitation Administration have reported that only four countries are at present in a position to export wheat. These countries are Canada, the United States, Australia and Argentina. As one of those countries which are able to help in relieving the present food crisis, Canada faces a great responsibility at this time. A program has already been announced for making available as much wheat as possible for export during the next few months. This program includes a ten per cent. reduction in the amount of wheat released for domestic milling on the basis of the amount used for that purpose in 1945, and a fifty per cent. reduction in wheat for distilling, also on the 1945 basis. In addition, priority will be given on rail transport of wheat for export, and numerous other measures have been provided for increasing the amount of wheat which can be sent from Canada to those countries whose need is now great.

• • • • •

Public Is Urged To Co-operate

Canadian farmers are being urged to plan their production to yield a maximum amount of foodstuffs not only this year, but for the next three or four years, for it is expected that shortages will continue for some time. The people have been asked to contribute to the success of the plan to export more food, by reducing their food consumption wherever possible and by eliminating waste, particularly in the use of wheat products. We are reminded that we have suffered no real hardship in regard to food in this country. Only a few articles have been rationed and this has been in most cases for the purpose of ensuring fair distribution rather than because of acute shortage. The people of Britain have accepted repeated cuts in an already meagre diet in order to do what they can to relieve the world food situation, and there is no doubt but that the people of Canada will *co-operate willingly to make as* large a contribution as possible to ease what Prime Minister King has called the "urgent and pressing need" of those in other countries.

Bid For Trade

Britain Is Out To Capture Market For Alarm Clocks

In Britain's new drive for export trade, nearly one hundred factories have been switched from specialized war production to alarm clocks. The idea is to capture the hungry market once dominated by Germany and Japan, and worth about three hundred million dollars annually. Regardless of anything else, we can be confident of one thing: The British clocks will work. And that could not be said of a lot of the junk palmed off on us by the former market jobbers.

Educated Chinese

Speak Flawless English Without Any Trace Of An Accent

An interesting fact about the opening of the United Nations Organization second session in New York is that the chairman is a Chinese, Dr. Quo-Tai-Chi.

Of course, Dr. Quo will speak in English. All the Chinese top officials and nearly all the junior members of embassies and consulates in English-speaking countries speak English. It is a striking fact that when the Chinese Ambassadors in Washington or Ottawa correspond with their fellow-countrymen in the United States or Canada, they exchange letters in English—not, as might be expected, in Chinese.

The "educated" Chinese speak flawless English, and they do so without a trace of "accent" common to most foreigners. Perhaps the only one who does so is Dr. Hsieh himself, who, although possessing a mastery of English that an American or Canadian professor might envy, does so with a delightful Scottish "burr". That is due to the fact that when he was a small boy his first tutor was a Scotsman. Like all Chinese Dr. Hsieh is a witty speaker, and the New York Sun referred to him on one occasion as a "Chinese Harry Lauder."—St. Thomas Times-Journal.

THE MODERN WAY

Three stories of a dismantled Buddhist pagoda rested on the ground in a park at Seoul, Korea, for 34 years, but American Army engineers put them together in three days. Thousands of Koreans watched as the battalion restored the national treasure, dismantled in 1512. 2667

Price Control And Rationing Information

Q.—Can you tell me when the canning sugar coupons will be declared valid?

A.—There will be ten pounds of canning sugar allowed this year. The first half of this canning sugar allotment will be available to consumers on May 2nd with coupons S8 to S12 declared valid. The balance of the ten pounds may be purchased on and after July 4th when S17 to S21 become valid.

—o—

Q.—What is the value of each butter coupon?

A.—Each butter coupon is valued at 8 ounces of butter.

—o—

Q.—I make butter for my own use only. Must I register with the local ration board?

A.—Dairy butter producers must register with the local ration board in their community even if the butter they produce is used in their own households only and is not sold.

—o—

Q.—Where do I apply to have the maximum rental fixed on a room in my home which I intend to rent out to an ex-serviceman and his wife?

A.—You should contact the rentals department in your nearest Wartime Prices and Trade Board office and they will see that the rentals is fixed on your room.

—o—

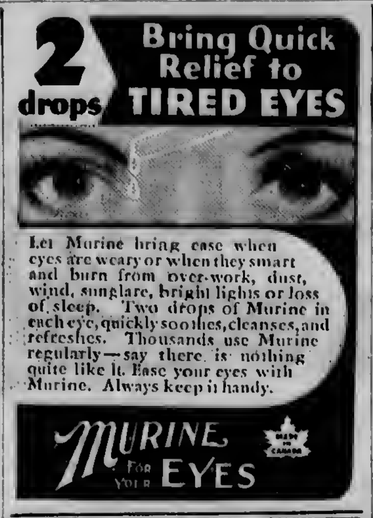
Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

Part-Time Workers

Made It Easy To Adjust Factory For Peacetime Production

LONDON.—Shortly before the outbreak of war, a United Kingdom firm, specializing in producing machines for marking laundry linen, placed on the market an apparatus which stamps linen invisible—the cypher can be read only by the laundry-worker with the aid of a specially adjusted mercury vapour discharge lamp. Twenty-five workers were employed in this small factory. During the war laundry requisites were forgotten—the firm undertook to make component parts for aircraft. An appeal was issued for part-time workers and soon 1,300 local people had responded to the call; during the ensuing years 28,000,000 component parts were processed. "If those women hadn't volunteered to help us", said a manager, "it would have taken our prewar staff 40 years to do the work". Now the factory has been adjusted to the making of laundry-marking machines again.

When Chopin died in 1849, his coffin was sprinkled with Polish earth in recognition of his great love for his country.



Hard To Keep

American Air Lines Find That A Stewardess Stays Only Short Time

Not without misgivings, the American Airlines graduated ninety flight stewardesses, the largets class ever trained by an American commercial airline in the sixteen years during which stewardesses have been on plane crews. They were schooled in such matters as serving meals, caring for babies, and aerodynamics.

The airline's misgivings arose from the fact that stewardesses, having been chosen partly for their personable appearance, don't stay long in the job. The company pleaded with the ninety graduates to tarry a while before marrying passengers or pilots. The average stewardess lasts only a year and a half. You get a gold pin if you stick for five years.—New York Herald Tribune.

Have Eye For Beauty

Chicago Youngsters Struck Because Teachers Not Pretty Enough

Among the less serious strikes in this country, says the New York Herald Tribune was one in East Chicago, Ind., involving about a hundred youngsters of the Riley grade school. They walked out of classes because, according to the strike leader, "We are tired of being taught by old and ugly teachers and want young and pretty ones."

The superintendent of schools persuaded the strikers to return. He advised them that the teachers in Riley school compared favorably in pulchritude with teachers in other East Chicago schools.

SOURCE OF PROTEIN

Experiments Show That Yeast Can Supplant Wheat In Many Ways

One way for American housewives to make up for the 40 per cent. cut in wheat and 20 in fats for the starving peoples overseas, is to add yeast to many of their home-cooked dishes.

Experiments showing that this addition of yeast is both palatable and one of the greatest improvements possible in nutrition were presented to the Federation of American Societies for Experimental Biology by Barnett Sure, head of the Department of Agricultural Chemistry of the University of Arkansas.

He showed by animal feeding that yeasts are one of the finest sources of protein, and furnish better proteins than those normally present in the wheat that Americans are asked to give up. The yeasts used for this purpose are both the ordinary sort and brewers' yeast.

He said that these yeasts can be used readily to enrich corn bread, rice, meat dishes, soups, especially thick soups and gravies, ketchup, chili, tomato juice, peanut butter, chocolate milk, malted milk, also in bread, muffins and clam chowder. And in cookies, cakes, doughnuts, stews, and cheese dishes. The yeasts were said not to change flavors of the dishes.

These yeast dishes provided in addition the entire vitamin B complex in rich amounts.

Professor Sure proposed a further addition to American diets of more soy beans or soy bean flour. Manchuria and America are the two great soy bean producers of the world. In animal tests Professor Sure reported the soy beans better nutritionally than many of the popular wheat and grain foods.

He said that blending of yeast and soy bean flour with wheat flour should be specially valuable for improving the diets of low income groups, whose foods are largely from cereal grains. The soy bean-yeast combination, he declared, should not be expensive.

GARDEN NOTES

Planning Will Help

When space is extremely limited planning is even more vital because it saves room.

In plotting, minimum widths between rows range from 12 inches for narrow things as lettuce, radish, carrots, beets, to 15 inches for beans and spinach, to 18 inches for corn, tomatoes and potatoes.

Alternate quick-maturing things like radish, lettuce and spinach with longer-maturing or larger growing vegetables such as swiss chard, beets, carrots and beans. The first named will be up and used before the latter require all the space.

No Hurry

Old-timers are seldom seen rushing the planting. As a matter of fact they will tell you there need be no special rush. It is a good thing to get a bit of the garden planted early, but it is foolish to risk the main planting until all danger of frost is over. And in any case if the garden is all planted at once then the harvest will all come together, with a feast for a few days followed by a famine.

In the greater part of Canada one can go on planting vegetables and flowers right up to July 1st—indeed in some areas it is possible to plant beans, carrots and beets even later and still get good returns. Experienced gardeners divide their seed into at least three parts and make successional sowing about ten days to two weeks apart. For tender things like beans, corn, potatoes, peppers, tomatoes, and so on, nothing is gained by rushing the season in any case.

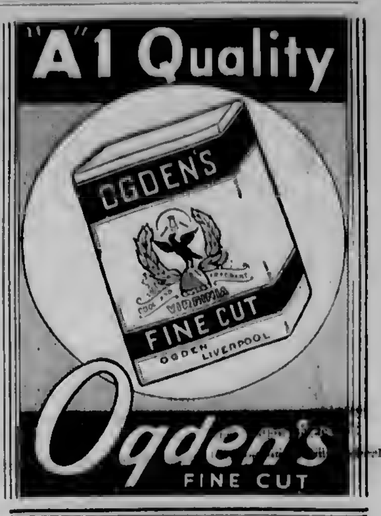
Big Croppers

Where space available for the vegetable garden is very limited bulky plants like corn, peas tomatoes, potatoes and other large vegetables create a special problem. Unlike lettuce, spinach, beets, beans, carrots, etc., which can be fitted into rows only 15 inches apart if necessary, these other things take up considerably more room. Corn, tomatoes and potatoes need from 18 inches to 2 feet between hills or plants, and if one is to have enough green peas for a meal from one picking then at least 30 feet of row, and preferably 50, will be necessary.

Most small garden operators—those with only a plot 20 feet or so each way at their disposal—usually decide after some experience to abandon potato growing altogether. And the experts agree that they are wise. The first new potatoes right from the garden at the door are a treat, but there are other things that take up less room that are even more satisfying. But the other three vegetables mentioned should not be given up without more consideration. It is absolutely impossible to duplicate the quality of peas or corn right out of the garden. As a matter of fact a distinct change takes place in both vegetables in from two to four hours after picking. The sugars change to starches and that is the reason why ordinary "bought" corn and peas simply do not compare in sweetness with the same vegetables picked fresh, cooked and ready for eating within an hour of harvesting.

BLITZ REMINDER

Residents of Wimborn, Minster, Eng., who learned to duck for shelter from buzzbombs and rockets, had to take cover again when two swans staged a fight over the main street, crashed into a chimney and fell through a plate glass window, scattering glass over shopping queues.



Britain's Future Builders

Plans Made To Train Larger Number Than Before War

The United Kingdom is aiming at training three times as many building apprentices and craftsmen at a time as were trained before the war. This was the objective named by Miss Ellen Wilkinson, Minister of Education, when she spoke at the inauguration of a course where building teachers from London and the home countries met to co-ordinate methods of building education. The pre-war figure for apprentices and craftsmen in training was thirty thousand—the present target is to train 90,000 at a time in Britain's technical colleges and institutes. Junior building schools which had an annual intake before the war of four hundred have now increased this to between five and six thousand.

The method by which the United Kingdom will obtain sufficient building workers for the future with adequate skill is the part-time release in the daytime from study. As Miss Wilkinson said, "work and study will go side-by-side." The Education Minister added that in starting courses of this kind the building industry will be pointing the way to County Colleges—which are an essential part of the provisions of the new Education Act—whose object is the provision of facilities for "sandwiching" work and study for pupils above the compulsory school age at least up to the age of eighteen.

Fiery, Itching Skin Gets Quick Relief

Here is a clean stainless penetrating antiseptic oil that will bring you speedy relief from the itching and distress of Eczema, Itching Toes and Feet, Rashes and skin troubles.

Not only does this healing antiseptic oil promote rapid and healthy healing in open sores and wounds, but boils and simple ulcers are also quickly relieved. In skin affections—the itching of Eczema is quickly stopped; the eruptions dry up and scale off in a very few days. The same is true of Barber's Itch, Salt Rheum and other skin eruptions.—Greaseless—Stainless.

GEMS OF THOUGHT

CONVERSATION

Conversation, in its better part,
May be esteem'd a gift and not an art,
Yet much depends, as in the tiller's toil,
On culture, and the sowing of the soil.—Cowper.

It is not easy to say how far an affable and courteous manner in conversation may go toward winning the affections.—Cicero.

When the heart speaks, however simple the words, its language is always acceptable to those who have hearts.—Mary Baker Eddy.

Equality is the life of conversation; and he is as much out who assumes to himself any part above another, as he who considers himself below the rest of the society.—Richard Steele.

The happiest conversation is that of which nothing is distinctly remembered, but a general effect of pleasing impressions.—Johnson.

Good-nature is more agreeable in conversation than wit, and gives a certain air to the countenance which is more amiable than beauty.—Joseph Addison.

In Greece peacock fans were known about 500 B.C.

YOU *know it if you have* PILES! *you'll know it* QUICKLY *when pile miseries are* RELIEVED

If you are troubled with itching piles or rectal soreness, do not delay treatment and run the risk of letting this condition become chronic. Any rectal itching or soreness or painful passage of stool is nature's warning and proper treatment should be secured at once.

For this purpose, get a package of Hem-Roid from any druggist and use as directed. This formula which is used internally is a small, easy to take tablet, will quickly relieve the itching and soreness and aid in healing the sore tender spots. Hem-Roid is pleasant to use, is highly recommended and it seems the height of folly for any one to risk a painful and chronic pile condition when so fine a remedy may be had at such a small cost. Money back if you are not entirely pleased.

NOTE—The sponsor of this notice is an old, reliable firm doing business in Canada for over 20 years. Hem-Roid must help your annoying and painful pile condition—must do it quickly, easily and pleasantly or your own test of this remarkably successful formula costs you nothing. Try it today.

YOU'RE TOPS in the family's estimation when you serve delicious Maxwell House Coffee. It's bought and enjoyed by more people than any other brand of coffee in the world.

Reduced railway fares for Easter between stations in Canada will be in effect from April 18 to midnight of April 23 in the first low holiday rate since government estrictions were lifted, it was announced today by F.H. Ball, Canadian Pacific Railway Company agent, Raymond. Similar bargain fares for teachers and students will also be available, but for a longer period.

These first low holiday fares, since the order three years ago prohibiting such reduced rate transportation to free the railways for military traffic, will be based on one- and- one- quarter single fare for a round trip ticket. The tickets are good going from Thursday, April 18 to 2 p.m. on Easter Monday, April 22, while they will be honored for the return journey up to mid-night of Tuesday, April 23.

On bunch lines where there is no train service on April 18, tickets will be sold to commence journey on April 17th. Similarly the return limit will be extended to make it "good on first available train" in cases where there is no train service on April 23.

The special Easter tickets for teachers and students will be available upon presentation of the usual certificate from Friday, April 5th, to April 23 going, with mid-night of May 7 the deadline for return.

WEEKLY LETTER

FLAX

In an effort to bring about an increased production of flax the guaranteed price has been raised from $2.75 to $3.25 per bushel, basis No. 1 C.W. Fort William. This definitely puts the price of flax in line with the price of wheat and in fact on a slightly higher level. This price increase emphasizes the critical shortage of vegetable oils in Canada, and flax is the most important oil-producing crop now being grown in this country. There is also a decided need for more flax in the United States and the Canadian crop will very likely fill their requirements.

Where flax is grown under favourable soil and moisture conditions one can usually expect to obtain approximately half as many bushels as would be obtained from wheat. One of the most important things to keep in mind, however, is that the land should be clean, as flax is one of the poorest crops to fight weeds. If weeds are liable to give trouble it is advisable to delap seeding until one or two crops of weeds have been destroyed, but it should be kept in mind that flax requires practically the same length of time to ripen as wheat. Flax is often wrongly looked upon as a short season crop.

Seed treatment of flax with one of the mercurial dusts, such as Ceresan or Leytosan, is recommended. Flax is frequently damaged in threshing and seed treatment is highly beneficial in such cases, it also often improves the germination.

Bison, Royal and Redwing are the three varities which are most commonly grown. Where the season is sufficiently long Bison or Royal should be chosen in preference to Redwing as they are better yielders. Royal generally out yields Bison, and it is rust resistant while Bison is not Royal ripens much less evenly ,however, and is sometimes more difficult to harvest on that account. It is also a little weaker in the straw.

Flax can be harvested quite satisfactorily by straight combine where the crop is fully ripened and weed growth has been checked by frost. When the crop has ripened it is generally preferable to swath the crop, running it into windrows, and then threshing with a combine equipped with a pick-up attachmen.

Pipes laid without road disturbance. London—A British invention that attracted much attention at the Acton Industrial Exhibition recently was a thrust borer to facilitate underground pipe and cable installation without road disturbance. This machine can be operated by one or two men and guarantees accurate alignment of each thrust tube. It ha sa pilot light which enables the operators to confirm that the intended level and direction are being maintained.

Inflation comes when we pay too high a price for living well and too small a price for living right.

Some people are so busy doing nothing they never have time todo any thing..

Announcing

the Appointment of

SCOTT SALMON - Raymond

as

REO TRUCK DEALER

● It is with great pleasure that the Reo Motor Company of Canada Ltd. welcomes this new dealer in the rapidly growing family of Reo Truck Dealers in Canada.

Here, an experienced personnel offers a friendly courteous service and intelligent assistance in the selection of truck equipment to fit the job, as well as an after sales service not only to Reo trucks—but repair work on *any* make of truck.

Truck owners and operators are invited to get acquainted with this enterprising dealer . . . where competent service is assured at the hands of expert mechanics, working with first class equipment and genuine parts.

The Reo Motor Company of Canada Ltd., join with their local friends in wishing this newly appointed dealership every success in continuing the traditional high-quality standards of the Reo organization.

REO MOTOR COMPANY OF CANADA LTD., STATION K, TORONTO

"It's something you girls shouldn't laugh at"

"Mother won't tell me what it cost," said Elaine to Cousin Edna, who was looking up the exquisite dress. "But it's within the budget, you may be sure. Trust mother for that."

"That does sound unromantic, especially on a day like this," Mother admitted. "But we could never have given Elaine such a wedding unless we *had* budgeted. It's something you girls shouldn't laugh at. Dad and I began budgeting on our wedding trip. We had to . . . and we just got home with a few cents margin."

"Isn't it an awful bother, though?"

"We'd be more bothered and worried without it. No, it's simple. First, we always set aside the money for Dad's life insurance; that means we have no worries about the future. Then we figure on so much a month for living expenses . . . and *then!* . . . with what's left we can be extravagant. That's the great thing . . . to feel when you're spending that the essentials and the future are taken care of. Then you can spend with an easy mind."

Budget for essentials first, remembering that one of the greatest essentials is future security . . . protection against adversity . . . and peace of mind in your own old age. There can be no substitute for life insurance in any family budget.

Near you, wherever you live, is a neighbour in the L.I.C. insurance business. Ask him for advice in planning your future. It is good citizenship to own life insurance.

A message from the Life Insurance Companies in Canada and their agents.

L-1215B

WORLD HAPPENINGS BRIEFLY TOLD

A block of 32 unperforated Canadian stamps issued in 1908 sold by auction in London for £206 ($927).

Prof. H. S. Massey told the Institute of Motor Industry that 10 years would be needed before the application of atomic energy to industry was reached.

Sir Herbert Baker, designer of many of London's most famous buildings, died recently aged 83. His most notable creation wns the Bank of England.

Wool production in Canada in 1945 amounted to 19,626,000 pounds, an increase of 347,000 pounds over the 1944 total, the Dominion hurean of statistics reported.

The naval correspondent of the London Daily Telegraph said the next British battleship to be scrapped will almost certainly be the 35,000-ton Rodney, completed in 1925.

Princess Margaret Rose made her first individual public appearance, inspecting a children's club in Bethnal Green, one of London's poorest and most bomb-damaged suburbs.

Every year in Britain, 20,000 persons are killed and nearly 1,000,000 injured in avoidable accidents in industry, in the home and on the roads, the London News Chronicle reported.

A country mansion near Sevenoaks, Kent, Eng., has been presented to the British Legion by Mr. and Mrs. Winston Churchill, to be used as a rehabilitation centre and convalescent home for ex-servicemen.

Canada's second national clothing drive to provide garments for the millions of distressed persons in the war-devastated countries of Europe will be launched June 17 and will continue until the end of that month.

A Necessary Job

Ex-Service Members Urged To Help Maintain Defensive Forces

Responsibility to educate the Canadian people to the need of maintaining peacetime forces lies with those who have heen in Canada's fighting services, said Brig. G. A. H. Trudeau, C.B.E., district officer commanding, M.D. 12.

Brig. Trudeau said he was a great believer in associations of interested persons to support efforts to recruit and maintain reserve forces of the navy, army and air force.

Organizations such as United Service Institutes could not oaly be useful in keeping alive the ties of friendship formed during the war but could also contribute toward educating the Canadian people as to the necessity of maintaining defensive forces, he said.

The atomic bomb and other scientific advances may bring about revolutionary changes in the fighting organizations but until more is known of changes that will have to be made, a defence organization will have to be maintained to bridge the gap. Canada is bridging the gap by the setting up of five commands for a reserve army, each of which will be responsihle for a division. The core of this system will he an active force from which personnel will be drawn to train the reserve forces.

The lesson that science had taught duriag the war is that no one anywhere can afford to be an isolationist. There will not be time to prepare ia the future, as there has been in the past, Brig. Trudeau declared. Every useful means should he employed to educate Canadians on the responsihility of doing what each can do to maiatain the reserve forces of the various services up to streagth.

Were Very Helpful

German Scientists Made Mistake By Publishing Their Discoveries

German scientists inadvertently helped the Allies wia the war. They even chipped in with helpful hints on the atomic bomh.

These scientists puhlished their theories and discoveries in hooks and magazines intended only for German eyes. But hundreds of valuable treatises were slipped out of the fatheriand and published.

Oscar Mollari of the alien property custodian's officers says "German studies in nuclear physics were especially helpful while we were workiag on the atomic bomb."

The Germans were trying to ferret information out of the U.S. and Britain, too, but Mr. Mollari doesn't think they had much luck. Allied scientists had decided on voluntary censorship, and stopped publishing their discoveries.

The Germans knew the Allies were pumping out a lot of German information. Goebbels himself once got so excited about it that he squawked: "Intcilectual thievery!"

A MIGHTY FORCE

The Montreal Star snys Mr. Bracken's argument is that now, as never before, Canada must stand firmly nt Britain's side. The three great powers in the world today aro not Great Britain, the United States and the Soviet Union, but the British Commonwealth, the United States and the Soviet Union. And while the Commonwealth stands as one, it remains, as ever, a mighty force for peace and order in an explosive world.

2667

WINNIPEG MAN BUILDS BICYCLE FOR FOUR—Idea of a bicycle built for four came to Tom Snowden of Winnipeg while he was in Englaad with the armored corps. With his brother, Bill and brother-in-law John Poole, the machine was built in two weeks. Taking it on trial spin are Dorothy Goodhall, Pearl Robertson, Joyce Ward and Barbara Hodgins.

Famous London Home

Was Acquired By Old Duke Of Wellington Century Ago

One of the sights of Old London seldom noticed is the Piccadilly residence of the old Duke of Wellington. The famous British general acquired it more than a hundred years ago. It is sometimes called "No. 1 London". It is the first house in the famed street counting from the west end. On one side it overlooks the Green Park and Piccadilly and on the other Rotten Row and Hyde Park. The position is ideal and the site of great value today. But the house is old-fashioned and would cost much for modernization. Now it is strange to read that the present Duke of Wellington wants to sell Apsley House and has offered it to the government. It seems to be going begging. For when it was given to the Great Duke the Crown reserved the right to forbid the erection of any other house or houses on the same site. Many of the West End clubs would like the site to replace structures destroyed in the blitzes but for this drawback.

Apsley House is part of the history of that end of London. The site was originally donated by George II to an old soldier in order that he might build a hut and sell his apples. That was quite a royal concession to war veterans of those bad old days. Lots and lots of war veterans had to beg for hread ia Great Britain after the earlier wars. The fine site was chosen by the Duke of Wellington when he had great acclaim from the people and was prime minister. (He was already an Irish baron hy heritage). Then his soldierly mind and shortsightedness in politics led him to antagonize the masses and they assailed their former hero. A mob attack upon Apsley caused the duke to have erected the unprepossessive high fence around Apsley House. The fence rather obscured the old-fashioned London home of the Wellingtons thereafter on one of the finest sights ia the British capital. Its future may he more prosaic hut its disposal will aeed legislation yet.—Brandon Sua.

Unique Paint Job

Was Done On Liner Queen Elizabeth During The War

Details of a 10-ton paint job done at Esquimalt, B.C., on the giant British Liner Queen Elizabeth have heen recalled by Canadian Paint and Varaish Magaziae after a long war-imposed blackout.

The huge paint joh, one of the most unique in the history of painting in Canada, was carried out In 1942 when the ocean queen was undergoing coaversion into a troop transport at Esquimalt. Twenty-four dozen special 4½ iach brushes as well as a nunher of other types of hrushes, worth $4,000 in all, were used in completing the job.

The 20,000 pounds of paint used was vital to protection of the ship in two ways: as camouflage in dangerous seas, and as an eneaay of the rust and corrosion which eventually would have hrought ahout a breakdown in the vessel's operation.—St. Thomas Times-Journal.

NEW TYPE ORGAN

A London firm is building a new type of electric organ which is claimed to he far superior to any foreign make. The organ—a standard practice two-manual type—plugs in to the mains. Without pipes or wind it is self-contaiaed, except for loudspeaker units comprising a flat aluminium diaphragm of special design. The cost is under one thousand pounds compared with two thousand pounds upward for a simllar pipe organ.

TIRED OF WAITING

Tired of waiting for a house, V. H. Hobbs of Exeter, Devon, England, has purchased a 105-foot infantry landing craft for his family. When converted, it will contain a hath, hot and cold water and electric light.

Pageantry Is Gone

But Quaint Old Customs Are Being Revived In London

Bit by bit Loadon's quaint old customs, suspended during the war, are coming back.

Much of the pageantry is gone, some of it never to return, and many ceremonies are makeshift and improvised, but the old ghosts can rest content that practices they founded are not forgotten.

Thus it is that one can see, perhaps, a procession of respectably clad businessmen shuffling through the streets.

It may he the Liverymen of the Worshipful Compaay of Stationers emerging from their smoked and battered home close to St. Paul's Cathedral, to attend an Ash Wedaesday service as they have done almost every year since 1612.

In that year a city of London alderman, John Morton, died and left to the Stationers' Company £150 ($675) as a fund to provide cakes and ale every Ash Wednesday to Liverymen of the company. His money was invested in a City property destroyed in the blitz.

But the custom will go on.

The Liverymen's colorful gowns, scarlet hoods and tudor caps were nearly all destroyed during air raids, but members of this wealthy guild walk proudly in a tradition which had its founding in 1556, when the company was incorporated.

Members who didn't attend the church service and don't want to leave their businesses and appear in person can send around a representative to collect their cakes, which are wrapped in a neat parcel.

For many it may take years and even then much of the ancient regalia will be lacking, destroyed in raids which levelled so many of the old guild halls. But the old customs will live on, perhaps with new ones to commemorate another survival.

The temperature of one of the sun's spots is about 4700 degrees centigrade. This is about 1000 degrees cooler than the sun's spot-free surface.

A Good Opportunity

Canadians In Germany Have Chance To Advance Musical Education

Unique in the Canadian Army is the conservatory of Music and Art recently opened at 2-7 Canadian Infantry Brigade at Aurich, Germaay, and operated by the Canadian Y.M.C.A. for the benefit of Canadian Army Occupation Force personnel.

Swamped with 180 applications before the opening, Supvr. Harvey Hodgins of Vancouver found he could accomodate only 55 pupils in the nine available classrooms where individual instruction is given by eight German civilian instructors.

"This Conservatory assists a lot of fellows who otherwise would have no opportunity in the Army to advance their musical education," said Pte. C. J. Homiek of Windsor, Ontario, a member of the Queens Own Rifles. "I have always wanted to play the violin, and through this Conservatory I aai having my first opportunity," was the comment of Cpl. G. Tostowaryk of Arbakka, Manitoba, Royal Winaipeg Rifles who paused in his piano studies to remark that the conservatory is a very efficient organization and the t aehers are highly capahle.

Pte. Frank Haufek of Winnipeg, one of the conservatory's leading organizers and a student in the art class, found and engaged the English-speaking German instructors in Ratzeburg, Lubeck. Supplies for the art classes had to be brought from Holland, since aone were available in Germany. Musical instruments came from the Knights of Columbus instrument depot in London. Schedules were worked out and most of the clerical work connected with the organization was done by Rfn. L. Massey of Montreal.

POTATOES FOR BRAZIL

The agriculture department announced the Superior School of Agriculture at Vicosa, Minas Gerais, Brazil, had ordered a sample shipment of Canadian seed potatoes which will he planted for testing in an area 2,000 feet above sea level where potatoes never before have been grown.

NO SHORTAGE SEEN

Ontario's Salt Beds Could Supply The World For Years

The following is an editorial taken from the Kitchener Record:

Although there was a time in the recent war when a salt shortage threatened in Canada, it was not due to a lack of salt, but rather to much greater use of salt for war purposes.

An authority on this country's salt resources states that beneath the area of Ontario lying between Goderick and Amherstburg, there is sufficient salt to meet the needs of all mankind for 90,000 years. One can detect a slight touch of envy whea the Moose Jaw Times-Herald quips: "You can put a little salt on that if you suspect that Ontario is doing a little boasting."

However, our western contemporary admits it is nice to know that "If you are superstitious and have the habit of throwing salt over your left shoulder to avert bad luck or insure good luck, you can go on with the practice and the salt will never be missed. It will also be possible for adults with a twinkle in their eyes to suggest that the 'young idea' put a little salt on a robia's tail and then be able to catch it. That pinch of salt is not going to he missed either."

The salt beds underlying Ontario are 1,000 feet in thickness and extend for what is said to be 3,000 square miles. The modern method of mining the salt is to bore a hole into the salt bed, pump water in and the briae out, and then the brine is refined aad the modern evaporator produces a salt of uniform small grain size.

Many of the old trade routes of the world were created for traffic in salt. The economic importance of salt is further indicated by the almost universal prevalence in ancieat and medieval times of salt taxes. The habitual use of salt is intimately connected with the advance of man from nomadic life to the agricultural life. It has been used as a medium of exchange from the time of the Mongol emperors and even today in Abyssinia and certain other parts of Africa and also in the Tibet aad adjoining areas it is used as money.

Many Food Wasters

Average Canadian Has Always Had Enough And To Spare

We are essentially a nation of wasters when it comes to the consumption of food. It has been often and truly said that a starving nation could live well from our garbage cans. It is a common sight to see a Canadian child push his meal away because it isn't exactly to his taste.

Spoiled girls grow up to be spoiled women who waste wantonly rather than do their housework carefully. Spoiled boys grow into spoiled men who cannot coaceive of any reason they cannot have all the liquor they want at any given time. Meals in restaurants and hotels are partly consumed because they aren't always perfect to the taste of the customer. —Vancouver News-Herald.

Music was printed for the first time in 1465.

Health League of Canada presents TOPICS of VITAL INTEREST

ANTI - PASTEURIZATION ARGUMENTS NOT SOUND SAYS HEALTH LEAGUE

Opponents of the principle of pasteurizing milk to make it safe for human consumption have made much of "natural milk"—a term which is basically unsound when it is applied to cow's milk that is being used for human consumption, states the Health League of Canada which at present is engaged in a Dominion-wide campaign to obtain provincial legislation calling for compulsory pasteurization. Ontario is the only province at present with such a law—a law which has resulted in drastic reduction of milk-borne diseases in that province.

Pasteurization is a simple, harmless, effective additional safeguard which should be insisted on over and above all sanitary precautions. To be completely safe, milk must come from certified animals, it must be cleanly handled, and it must be pasteurized.

The argument that clean milk need not be pasteurized doesn't hold because, while clean milk is essential from a sanitary point of view, even it can carry germs if it is unpasteurized. True, clean milk safeguards health to a certain extent in that from it is eliminated much disease-carrying dirt. However, it is not dependably safe.

There is no evidence to support the argument that pasteurization destroys any food element of which milk has an adequate supply. Properly carried out, pasteurizing does not injuriously affect the taste of milk or the separation of the cream. Studies carried out on large numbers of children have shown that those who are fed on pasteurized milk thrive just as well as those to whom raw milk is given.

Once again, the Health League wishes to emphasize that Canadians do not have to drink disease-carrying raw milk. All milk can be made safe through pasteurization.

If the commercially pasteurized product is unavailable to them, Canadians can make their milk safe themselves. The Health League of Canada, 111 Avenue Road, Toronto 5, Ontario, can supply details of easy home methods.

THE UNKNOWN GREAT

An American correspondent interviewed a Russian soldier in Berlin and found that he thought Winston Churchill was an American and had never heard of President Truman. Years ago, while William Ewart Gladstone was at the height of his fame, they found a farmer in Northumberland, who had never heard of Gladstone.

Brief On Social Security Given To Parliament

OTTAWA.—Recommendations looking toward "a national program of social security as a whole" have been placed before Prime Minister King and provincial premiers by the Canadian welfare council, R. E. G. Davis, council director, announced.

The brief, entitled "Dominion-provincial relations and social security," made these recommendations:

1. A plan for contributory old age insurance extended to cover "the whole gainfully employed population."
2. Work training to complement unemployment insurance benefits.
3. Extension of the national housing act into low-rental projects.
4. Abolition of "residence rules" for social service benefits.

The brief also criticizes Dominion proposals now before the Dominion-provincial authorities.

The brief said 70 was too high for a pension age and the means test basis for assistance to persons over 65 would not represent an adequate solution to the problem of the not-so-old group.

It urged a contributory insurance system "to cover the whole gainfully employed population, including farmers and self-employed," and financed jointly by the Dominion and provinces.

The council urged a national conference of provincial and municipal representatives to abolish or modify "residence rules" in connection with the extension of Canadian social services. Objective of such a conference would be "that no person in Canada shall be denied the social services to which he is entitled merely because he has not spent a year or longer in some province or local community."

The brief summed up the goal of any social security program as "a comprehensive national system of social security involving a three-way partnership between the Dominion, the provinces and the local governments, integrated with the work of private agencies."

CHANGES APPROVED

Amended Land Act Will Benefit Veterans Of Both Wars

OTTAWA.—Two major changes in the Veterans Land Act were approved by the Veterans committee to the commons. They will be put into effect by order-in-council. As outlined by Veterans Minister Mackenzie, they would:

1. Give the minister discretionary power to give the act's benefits to veterans of both Great Wars who still owe money under the Soldiers Settlement Act—its predecessor after the First Great War.
2. Provide a greater measure of capital assistance for purchase of equipment and livestock and less for land and allow veterans to purchase livestock and equipment under the act for use on rented or privately-purchased land.

The first, Mr. Mackenzie said, would benefit "certain" veterans of both wars who are unreasonably excluded from the land act under which veterans are settled on farms and small holdings.

The second would be of particular help in planning for 1947. It had become necessary because of rising land prices which meant too much of the $6,000 ceiling was being eaten up for land alone. To increase that ceiling would only encourage the rise.

LABOR CONFERENCE

Mitchell Hopes To Meet Provincial Ministers This Summer

OTTAWA.—Labor Minister Mitchell said he hopes to call a conference with provincial ministers this summer to charter a policy which would be followed when the provinces resume jurisdiction over labor matters.

Mr. Mitchell made the statement to a delegation from the Canadian and Catholic Confederation of Labor, which presented to some members of the cabinet a brief calling for wage increases, reduction in income tax, changes in existing labor legislations and the undertakings of projects to provide employment.

The labor minister spoke before Justice Minister St. Laurent outlined the provisions of the recent $1,250,000,000 Canadian loan to Britain, which he termed the best insurance premium he could think of against depression.

ENERGY FROM SUN

Soviet Astronomers Have Newest Instruments For This Study

MOSCOW.—Academician V. Fesenkov, writing in Izvestia, said Soviet astronomers are busy studying atomic energy in the cosmos from new and reconstructed observatories equipped with the newest instruments and apparatus. Astronomers recently have discovered indications that atomic energy is released not only from within the depths of the sun but also from close to its surface, the article said.

GIRLS LEARN FLYING—Conversion of the London, Ont., airport to peacetime basis has brought girls and women to the field as student pilots. Isobel Pearson (left), a Saskatchewan girl employed in London as a T.C.A. radio operator, now flies solo at the school. Merrilyn Rogers (right), a London girl on the staff of Canadian General Electric, is another solo pilot. During the war thousands of Canadian, English, Australian and New Zealand airmen trained at the airport.

Harvest Not Expected To End Shortages

LONDON. — The British government, in a 10,000-word official report on the world food situation, said bluntly that the food problem no longer is one of austerity but of absolute shortages and warns that the present world difficulties are unlikely to disappear with the next harvest.

The report, which explains the causes of the present shortages and forecasts the prospects for the future, is a sombre story of deficiencies brought about by the war and nature. The survey will form the background of the food debate in the British house of commons.

Here are some of the outstanding points in the report issued as a government white paper:

1. Only a combination of favorable circumstances can bring about any material improvement in the world food situation while unfavorable crops could spell disaster;
2. The world deficit of wheat is 8,000,000 tons for the 1945-46 crop. No early solution of the wheat situation can be expected;
3. The shortage of rice is equally acute;
4. Future supplies of meat will depend mainly on the size of this year's grain harvest;
5. World export of fats this year will be little more than half the pre-war level and supplies in importing countries are estimated at 80 per cent of normal.

The report forecasts an eventual reduction in the domestic production of pigs, meat and eggs for Britain, already dependent on imports for half her food, because of cuts in feeding stuff rations.

The only bright spot is sugar. The outlook for the future is more favorable and this year may prove the low point for sugar supplies.

The report added that the Washington mission by Food Minister Sir Ben Smith last month, was made against a background of scarcity.

"The main object of this mission," the white paper said, "was to discuss with the other members of the combined food board the current position in regard to wheat and rice, to devise methods of ensuring that maximum quantities were procured and exported from the supplying countries, and to secure the most satisfactory distribution of these two foodstuffs for the remainder of the first half of 1946."

TAKING NEW JOB

Soil Research Official Will Join UNRRA Mission Going To China

SWIFT CURRENT. — Dr. W. S. Chepil, who has been in charge of soil research at the Dominion experimental station here, has left for Washington, where he will take a short course prior to joining an UNRRA mission leaving for China.

His work with UNRRA will be that of a soil examiner specialist.

During the war dykes were often destroyed by the Chinese to let the water break through and hold back the advancing Japanese army. This flooding of the lands has made them unproductive to a large extent and it will be the restoration of their productivity with which Dr. Chepil will be concerned.

According to the specialist it will take at least a year or two to restore the land to its normal productivity.

NO TAX EXTENSION

OTTAWA.—Balances on 1945 income tax will fall due April 30 and there will be no extension of time. Last year the time limit for payments was extended until August because of a Victory Loan campaign.

DROP IN TRADE

OTTAWA. — Canada's external trade in February was valued at $271,731,000, a decline of 33 per cent. from $352,726,000 during the same month a year ago, the Dominion bureau of statistics reported.

CAUSES ANXIETY

Canada's Proposed Exit Permit Worries British Transport Authorities

LONDON.—Canadian proposals to relax exit permit restrictions for persons leaving the Dominion and desiring to visit the United Kingdom are causing anxiety among transport authorities here, it was learned.

While space is available on ships travelling from Canada to the United Kingdom, the westbound situation, in the words of one official, is "more difficult than ever."

More than 29,500 wives and children of Canadian servicemen still remain to be moved and also waiting are 3,812 civilians who are entitled to return to Canada as soon as shipping space is available.

The situation is complicated by Canadian servicemen who take their discharges in the Dominion and then return to the United Kingdom. Some spend considerable money making a return trip here and when they find life in an English village is not as attractive to a civilian as it was to a soldier, make application for a priority or other assistance in returning to Canada.

No assistance is given in such cases but, as after the First Great War, Dominion government help may have to be provided for Canadian veterans who fail to make good in the United Kingdom.

Small Increase In Living Cost For Canadians

OTTAWA.—No "serious increase" in the cost of living was implied by the various upward price adjustments announced lately by the wartime prices and trade board, Finance Minister J. L. Ilsley reassured the Canadian people in a statement read to the house in which he stressed the government was not abandoning its price control policy.

At the same time he disclosed in the course of the next three or four months small increases would be allowed in the retail prices of clothing and furnishings, following upon the government's decision to eliminate subsidies on imports of raw cotton and wool. An increase not exceeding 25 cents in the retail prices of some shirts was announced prior to the minister's statement.

Mr. Ilsley emphasized the increases allowed in certain industries did not mean the government's anti-inflation policy was beginning to falter, nor did they mean the government was contemplating an early lifting of the price control system.

"The aim of the government's price policy for the transition period is to give a reasonable degree of stability to living costs while creating conditions favorable to a high level of employment and production. In practice this means that where the board is satisfied production is capable of expanding on the basis of basic period selling prices those prices will continue.

"Where it can be demonstrated to the board's satisfaction that present ceiling prices are prejudicially affecting production and employment, adjustments are made," said Mr. Ilsley.

The recent butter price increase was to provide an additional incentive so that even the present restricted consumer ration might be met. In the case of the increases in pork products the United Kingdom had agreed to raise contract prices, realizing hog numbers were declining, and the domestic price was adjusted to the new level, he said.

Mr. Ilsley declared the government had no intention of putting into effect "what some political and other groups are advocating," the removal of price control.

PRESIDES AT U.N.O. — Dr. Quo Tai-Chi, Chinese delegate, is presiding over the U.N.O. security council session in New York.

TREK HALF OVER

But Expedition To Arctic About Two Days Behind Schedule

COPPERMINE, N.W.T.—The moving force of exercise Muskox, Canadian army thrust into the Arctic, has passed the halfway mark in its 3,100 mile trek from Churchill to Edmonton and last reports placed the party southwest of here travelling through deep snow.

A message dated March 31, said the force was 25 miles from Coppermine, facing a "tough" leg that was expected to prove tricky.

Muskox commander Col. P. D. Bard, Montreal, said he wanted "to take advantage of the good weather that has been forecast" to guide them through hills that rise as high as 2,500 feet.

The force, which left Churchill Feb. 16 hoping to reach Edmonton by May 5, is still travelling about two days behind schedule.

Two additions were made to the roll at Coppermine when Col. J. T. Wilson, director of operational research at Ottawa, and Tom Manning, Dominion observatory, went along with the force. At the same time Sgmn. Bourdon was replaced by L/Cpl. Albert Maloney of Mosshank, Sask.

LONDON.—The Soviet Union rejected an invitation to join 18 countries in the emergency conference on European cereal supplies here, conference officials said. There was no explanation of the Soviet refusal.

CANADA'S GOVERNOR-GENERAL ELECT ACKNOWLEDGES CHEERS—Governor-general-elect of Canada, Field Marshal Viscount Alexander of Tunis acknowledges the cheers of Londoners as he and Lady Alexander ride through Fleet St. after he had received the honorary freedom of the city. They come to Canada in June.

World's Wheat Need Greater Than Estimated

OTTAWA. — In a survey of the world wheat situation, the Dominion bureau of statistics said that deficit areas report the need for approximately 3,400,000 long tons more wheat than the 17,000,000 tons estimated last month.

No change was reported in the estimated world's exportable surplus of up to 12,000,000 long tons.

Failure of the Indian monsoon, droughts which struck France and North Africa, lack of adequate fertilizer supplies and dislocations occasioned by the war took a "terrible toll" of good production in Europe, Asia and Africa last year, the report said.

This, combined with below-average crops in three of the four large exporting countries, inevitably brought about the current shortage. The United States department of agriculture's office of foreign agricultural relations had estimated 1945 world wheat production at 5,200,000,000 bushels, the smallest since 1929 and eight per cent. less than 1944.

Further programs intended to reduce domestic consumption of foodstuffs, thereby providing additional exportable supplies, had been announced by both the Canadian and United States governments.

Canada hoped to increase available exportable surpluses by reducing the amount of wheat used by distillers and millers, encouraging conservation practises and offering certain concessions to farmers which would permit them to deliver their old wheat now and take cash settlement any time in 1946, 1947 or 1948.

The survey quoted a March 20 announcement by the United States crop reporting board that prospective 1946 plantings would equal the "relatively high level of recent years . . . if weather permits" but that U.S. producers expected to have "more than usual difficulty" obtaining an adequate supply of labor and new machinery for replacement.

The Argentine ministry of agriculture had reported an exportable wheat surplus of 69,700,000 bushels on Feb. 15, compared with a Jan. 15 estimate of 69,400,000 bushels and an allowance for 2,500,000 bushels exported during that four-week period.

In Australia wheat prices to farmers may be a deciding factor in wheat acreage sown with the acreage goal set at 15,500,000 acres. Private opinion doubts whether this could be achieved unless prices are raised substantially. Since Jan. 1 Australian exports had averaged nearly 1,000,000 bushels a week, all to non-European destinations.

FOR CITIZENSHIP

Bill Calls For One Year's Residence Instead Of Five

OTTAWA. — Under the government's Canadian Citizenship bill, only one year of residence in Canada, instead of five, will be required for the naturalization of those who served outside of Canada in the Dominion's armed forces during the war, State Secretary Martin announced in the commons.

Mr. Martin made the announcement in moving second reading of the bill, aimed at clarifying the definition of Canadian citizenship. A similar bill reached first reading at the last session of parliament but was dropped because of pressure of other business.

POWDERED MILK

Would Be Great Aid To China Says Dairy Official

VANCOUVER.—Wartime development of "reconstituted" milk will enable Canadian dairies to supply what tastes like fresh milk to a whole Chinese city, Robert C. Smellie, president of the national dairy council, told British Columbia dairymen here.

Mr. Smellie said that millions of pounds of powdered milk had passed through reconstituting machines at Royal Canadian Air Force stations overseas. He said the milk, when kept at controlled temperatures for 24 hours, is indistinguishable from fresh milk.

PREFERS TO STAY OUT

BERN. — Foreign Minister Max Petitpierre told the Swiss parliament that Switzerland would not become a member of the United Nations. "Switzerland will not apply for admission to UNO even if invited to do so as long as our status of permanent neutrality is considered incompatible with certain obligations under the UNO charter of San Francisco," he said.

ROYALTY AT WEDDING

LONDON.—The King and Queen, Princesses Elizabeth and Margaret and Queen Mary attended the wedding of Maj. Edward Benton and Miss Lavinia Lascelles at St. George's chapel in Windsor castle. The bride is the daughter of the King's private secretary, Sir Alan Lascelles. Maj. Benton is an officer of the Black Watch.

HERE and THERE

FAMINE

Last week we were alarmed to hear that unless there is a large increase in the food going to Europe there would be widespread starvation. President Truman sent Mr.Hoover as a special flying agent to find out thefacts on the famine front. His reports are appalling. He said "If our overseas supplies were to stop for a month there would be a whole sale loss of life. There is already a large increase in disease and in consequent mortality."

The food stocks of the world are very low. There is not sufficient rice and wheat to last until the coming harvest and for this reason rations have been cut in all the occupied countries until they are on starvation diets.

Unless U.N.R.R.A. can ship greater supplies to Europe these will be still further reduced.

Mr. Hoover's report to Washington makes clear the impeding pinch all over the war torn countries.

North African Zone— "Farmers are worse off than the urban population because of drought. Livestock losses are very heavy. 1300 calories is the daily dation (2500 is considered minimum). 250,000 tons of grain are needed immediately.

Italy and France— French city dwellers get less than 1900 calories, Italian less than 1600 (tho nverage American is over 3400). The white collar workers and the children ade suffering most. These two countries need 2 million tons of grain by mid summer.

It is hard to shake well-fed Canadians out of their apathy, but a few trips through these countries with their starving war orphans might stir us to netion.

Czechoslavakia— 25 percent of the children are tubercular. The greatest need is for protective foods to halt the spread of anemia, rickets and tuberculosis.

Poland presents an appalling scene. The Germans attempt. to destroy intellectually and morally and almost succeeded. They are trying to lift themselves out of the darkness. They live mainly on potatoes, cabbage and black bread with only enough of these to last a month. Wheat forseed is needed, 71 million bushels—where is it coming from when they are starving.

UNRRA is not concerned with Germany but you have seen pictures of women falling in the street from hunger.

The most optomistic don't see any chance for improvement until 1947 and maybe not then.

Fiery Fiorello La Guardia was put in a chairman of UNRRA last week, and promised dynamic action to meet the crisis. Already he is calling for more ships and wheat to be rushed to Europe. In spite of help we may expect a greater number of people to starve in the next six months than were killed in the war.

STATUE TO DUTCH SCOUT

At one end of an important bridge in Nijmegen, Holland, will shortly be erected a statue honoring a Boy Scout. It will recall the heroic efforts of a Dutch boy scout who was entrusted by the British to carrya message through the enemy lines. In making delivery it was necessary for this Scout to cross a heavily guarded bridge. As he was creeping across, removing as he went the fuses from the explosives prepared by the Germans, he was seen, captured and shortly after shot. The message got through by another route, but the courage of Jan Van Hoof, the Dutch Scout who gave his life, will be kept green by the erection of this monument.

Standing on your dignity wont increase your stature.

We fight to earn a living instead of to learn to live.

No man can afford to let himself go unless he lets go of himself.

Get ready for Spring!

The trees will soon be taking on their new raiment and spring will be whispering to farmers everywhere "How about a new cultivator?—how about other farm machinery? — how about this and that?" Now is the time to get ready for spring. Ready money for the go-ahead farmer is available at the Bank of Montreal. If a loan will help, see your nearest Bank of Montreal manager.

He knows the farmer's problems and is ready to work with you, and to put money to work for you, to make your farm a better farm. *Ask for the folder* "Quiz for a Go-Ahead Farmer."

NATURE CHECKS HIS EQUIPMENT

YOUR CAR OR TRUCK REQUIRES AN EXPERT MECHANIC!

MOTHER NATURE has given the Beaver four sharp-cutting teeth with persistent fast-growing pulps. Scientists say he can grow new teeth quickly and easily, and without them, he would die in a week. Your car or truck is no Beaver. When parts wear out, replacement is a job for an expert mechanic. But it's a good idea to have your vehicle checked periodically BEFORE the damage is done. We offer you the services of our Service Department, and a check-up which includes oil change; adjustment of such vital parts as engine, brakes, steering, starting and lighting equipment; wheel packing; lubrication of rear end and transmission.

Because of the heavy pressure of [illegible] jobs, it's a good idea to call for an appointment, to avoid unnecessary delay. Keep 'em rolling!

We use ONLY genuine factory-approved parts in repairing your Chrysler or Plymouth motor car or Fargo truck. Parts are easily available either in our own Parts Department or from the nearest Factory Parts Depot.

Correct Answer

Radios More Common Than Bath Tubs In U.S. Houses

The Winrton, Ont., Echo, says: Listening to a quiz program on the radio the other night the master-of-ceremonies asked the contestant whether bath tubs or radios were more common in houses in the United States. The contestant answered correctly by saying "Radios".

It seems a logical answer but hardly feasible. However, taken locally we'd venture a guess that two-fifths of local homes are without the convenience of a bath tub, while radios are in operation in nine out of ten local homes. Further comment withheld.

OUR COMPLETE SHORT STORY—

RABBIT FOOT LUCK

By DON. CAMERON SHAFER

Copyright
Wheeler Newspaper Syndicate

BEFORE Jake left the old gray farmhouse, where he lived alone, on this carefully planned mission of death, he knew that, with everything worked out to the last little detail, all he needed was an extra bit of good luck. Not that he worried about this, being an ignorant and superstitious man who believed that good luck could be propitiated by certain charms and that bad luck could be kept from following one by simple tricks of magic. Before he started out, with his double-gun under his left arm, he made certain that he carried his lucky stone and that the lucky silver cross, worn by his father before him for similar reasons, was suspended from his neck by a strong cord. He lifted up a flat stone, spat on the underside, and replaced it carefully.

"If only I had me a rabbit foot," living so long alone he talked aloud to himself, "then I would be all set."

Fortunately this was something easily remedied. His lethal way would take him through briar patches where cotton-tails abounded. And shooting rabbits was something Jake enjoyed. He killed all game, in season and out, and, not content with this, he stoned snakes and shot hawks and woodchucks for amusement.

Nevertheless he was a very competent and successful big game hunter, killing his share of deer and bear, and he had hunted the biggest game of all—man. In the first World War, in the darkness of No-Man's-Land, night after night, he hunted most successfully with all the skill and craft of his kind.

A tall gangling man, unshaven, none too clean, carrying a good double-barreled gun under his left arm, Jake hurried across the hill pasture and up an old woodrond townrd Honey Hollow. In right side pocket of his old coat was a new empty shell he had picked up in the woods a few days before for this very occasion. Not a chance of those smart city detectives he had read about identifying it with his gun. This was Saturday afternoon and the woods would be full of strange hunters from nearby towns and more distant cities. Jake considered it his good luck that hunting accidents were usually common this fall. Already a hunter had been killed by a companion and another seriously wounded.

This was the afternoon Chris Vrooman, his neighbor, enjoyed being afield with gun and setters every week during the hunting season. When the thing was done, Jake decided grimly, he would get rid of those dogs.

"I never liked dogs anyway!"

Chris and Sarah Vrooman lived very peacefully and happily on an adjoining farm. They were hard working farmer folk and consequently, they had a little money in the bank, besides a well stocked farm. Jake was most friendly with the Vroomans, visiting there as often as he could. Even though he neglected his own farm, he helped Chris during harvest, or whenever an extra hand was needed. No one suspected, Chris and Sarah least of all, that she was the reason why he came so often and stayed so long, starting from the day, now long past, when Jake entered the Vrooman farmhouse to find Sarah in her own husband's arms.

That was the start . . . Jake attributed Chris' success in life to having a strong, healthy and good looking woman like Sarah to help him. He reasoned that, with Chris out of the way, he could have this woman, who would then be alone in the world, the farm and the money in the bank, which he thought was much more than it really was. For years, while this obsession grew within his envious brain, Jake had hoped that something would happen to Chris, who was not only the happiest man in the township, but apparently the healthiest one as well. Last night Jake had decided that he would wait no longer. This day something would happen to Chris.

As Jake progressed up the hill he could hear distant shooting along the wooded heights. This was exactly what he expected and desired. The more shooting the better for his deadly purpose. From the top of Laural Hill he saw Chris in the distance, with his dogs to heel, crossing the bushy cover along the slope of a woodlot. By now Jake knew Chris' hunting habits so well that he could intercept him unobserved near the outlet of a little muddy forest pond where the dogs often picked up a few flight woodcock. Guns were booming on the forested heights. Soon he recognized the sharp crack of Chris' little gauge.

"This is one day when the birds will be lucky!" grimly to himself.

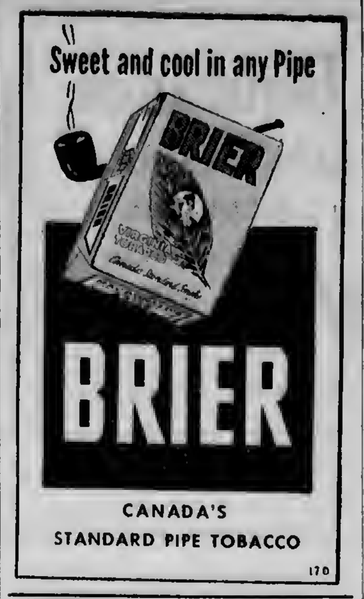
Topping a low ridge, well covered with small hemlocks, a big buck rabbit scuttled from its form, white tail bobbing. Jake's gun flashed to his shoulder—he almost never missed—the rabbit went end over end on a difficult cross shot.

"There's my lucky rabbit foot!"

The rabbit was not dead, thrashing about in the leaves. Jake hurried over and grabbed its ears. The wounded cotton-tail struggled violently, kicking out with long hind legs tipped with strong nails in the only defence a rabbit has. Jake needed both hands to hold and kill it. Placing the double-gun between his knees, the left barrel still loaded and the safety off, he grabbed for the kicking legs with his free hand. One of the long legs thrust far down—a toenail caught the trigger—

Chris' dogs, trailing a grouse, found the body and recognized it. Sharp barking brought Chris. He read what had happened from the sign and the dead rabbit.

"Jake always thought a rabbit's foot was good luck!" said Chris, startled and a little frightened. "I'll run back home and telephone the coroner. Such foolishness! There isn't any good luck for anyone in a rabbit's foot."



SMILE AWHILE

The owner of the country newspaper went home to dinner, smiling radiantly.

"You must have had some good fortune this morning," greeted his wife.

"Indeed, I did," announced the owner. "Jim Smith, who hasn't paid his subscription for ten years, came in and stopped his paper."

* * * *

"Did you get that cigar from a friend?"

"I don't know yet."

* * * *

First Spinster: Is it true that you are going to be married?

Second same: No, but I'm thankful for the rumor.

* * * *

A robbery had been committed in the village and a detective had been sent to investigate.

"Have you seen any mysterious strangers about here lately?" asked the detective of the old villager.

"Yes, sir," replied the old man. "There was a man 'ere with the circus last week, and 'e took a pair of rabbits out o' my whiskers!"

* * * *

Barber: You say you've been here before? I don't remember your face.

Customer: Probably not—it's all healed up now.

* * * *

An old colored man was asked if his neighbors were honest.

"Yes, sir," he replied. "Dey certainly am honest."

"But if your neighbors are so honest, why do you have a loaded shotgun near your hen coop?" he was asked.

Man," said the old chap, "dat's to keep 'em honest!"

* * * *

The young man was discussing his love affair with a sympathetic friend.

"You say she partially returned your affections?" asked the friend.

"Yes, she sent back all the letters but kept the jewelry."

* * * *

He was taking the customary test for the Home Guard service, when the instructor asked: "What is the best way to immobilize your car?"

"Let my wife drive it," came the immediate reply.

* * * *

"Is the boss in?"

"No; he's gone out for lunch."

"Will he be in after lunch?"

"No, that's what he's gone out after."

* * * *

A speaker said recently that many statements are made in commercial correspondence which are not taken literally. Such as "We expect to receive your remittance in full settlement by return."

* * * *

"We were surrounded by natives," related the explorer. "They just uttered savage cries, danced madly and beat the earth with their clubs . . ."

"Sounds like golf," said the bored listener. 2667

EXCEPTIONAL RECORD

Canada Has Exported More Wheat Per Capita Than Other Nations

"In proportion to our population Canada has exported, to meet the needs of the world over the past few years, more food than any other nation," the Prime Minister emphasized (in his statement on the food situation). Canada did this at fair price levels, not at prices which scarcity conditions might have allowed.

Of wheat alone Canada has exported, in the past three crop years, over one billion bushels, or about a million bushels each working day. Since 1942 Canada has contributed 20,000 tons of wheat monthly to Greece, an amount which kept about half the population of that country alive. In 1943 we contributed 100,000 tons of wheat to relieve famine conditions in India.

Wheat, of course, is only part of the story of food shipments from this country, but it is an impressive part. By the end of July all wheat accumulated in elevators during the war years will have been shipped, there will remain only what may be stored on farms and hope for a good crop this year. In the meantime, states Mr. King, the general food picture throughout the world is "urgent and desparate."—Ottawa Journal.

SELECTED

RECIPES

FAMILY MEAT LOAF

3 cups Grape-Nuts Flakes
2 pounds ground meat (*)
1 egg
2 teaspoons salt
¾ cup chopped celery
1 tablespoon minced onion
½ teaspoon sage
¼ cup chopped celery leaves
1 tablespoon chopped parsley
¼ teaspoon pepper
¼ cup ketchup
1 cup milk or stock

Crush cereal flakes slightly. Combine remaining ingredients in order given; mix well. Add flakes. Pack into greased 9x5x3-inch loaf pan. Bake in moderate oven (375 degrees F.) 1 hour and 15 minutes. Makes 8 to 10 servings.

Serve hot, plain or with tomato or horse-radish sauce. Or surround with cooked vegetables, such as buttered small carrots and onions; cauliflower and green beans; or cubed yellow turnip and sauteed green peppers. Or serve cold, garnished with moulds of jellied cole slaw.

(*) For meat, use 1½ pound beef and ½ pound lean pork. Or use 1 pound each veal and lean pork. Or use 4 cups ground cooked meat.

Back To Old Terms

Diplomats Might Be Well Advised To Change Their Methods

Calling the other fellow a liar has never helped in reaching agreements, and never will. Call your neighbor a liar over the back fence, and, if he doesn't come right over the fence at you, it's sure the two families will soon be hostile as all get out, perhaps not speaking to each other, but saying plenty about each other. No, we think it's high time that diplomats got back to using the language of diplomacy. It may not always have been just as open and above-board as one would have liked, but at least it did not produce an immediate chip-on-the-shoulder reaction. —Edmonton Journal.

MAPLE LEAF GETS TOP HONORS—Most popular with the parliamentary committee considering designs is this one displayed by Estelle Harper. Upper half is red, lower half is white, maple leaf is green. Diversity of designs including Union Jacks, maple leafs and beavers predominate, with a fair sprinkling of fleur-de-lis proclaiming the French origin of many Canadian citizens. Some flags feature human figures. One is simply a large eye with long lashes in color. Others show animals and birds.

HANDY GADGETS

Men laugh at the jammed handbags, the women carry. But with men discarding vests, and even coats, in the warm weather, the time is coming, says the Windsor Star, when we shall be envying them these handy gadgets, as we do every year.

WOMEN HELP

The Ottawa Citizen says it is estimated that the average man speaks twelve million words a year. You may think it a tremendous amount of wordage but we understand that in this case "man" is used in the generic sense, and includes "woman".

ROEG'S GALLERY

1. Mr. Roeg—as he looks to the waitress at "The Coffee Pot". (At first glance you wouldn't say that Mr. Roeg is a particularly prize specimen).

2. Mr. Roeg, as he looks to the office force. ("What's biting old Simon Legree," they want to know. "Jumpy as a trout!")

3. Mr. Roeg, as he thinks he looks. ("Gotta slow down," he mutters, "guess I've been hustling too much. Better drop in and see the Doc.")

4. Mr. Roeg as he looks to the doctor. ("While plenty of folks can drink tea and coffee with no ill effects," the doctor says, "you're not one of them. Switch to Postum! It contains no caffein or stimulants of any kind.")

5. Mr. Roeg as he looks to his wife that night. ("Darling, you've lost your job," she exclaims. "Worse", he replies. "Doc says I gotta cut out tea and coffee.")

6. Mr. Roeg as he looks after his first good swallow of Postum. ("Well, *well!*" he says to his wife. "I'm glad that Doc put me on Postum. It's a grand-tasting, he-man's drink, with a fine flavor all its own.")
